PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer pursuing B.Tech in Computer Science Engineering at Punjab Engineering College, Chandigarh. Proficient in Python and C++ with foundational knowledge of Java Script. Experienced in developing Retrieval-Augmented Generation (RAG) chatbots, machine learning models, embeddings, vector search, and predictive analytics solutions. Actively learning Data Structures and Algorithms (DSA) to strengthen problem-solving abilities and deepen understanding of core computer science concepts. Passionate about leveraging AI and machine learning to solve real-world problems and build impactful intelligent systems.

WORK EXPERIENCE

Technical Intern Internship Feb 2026 – May 2026
Unlox (Rivoquix Learning Private Limited) – Remote

- Developed and deployed 2 RAG-based chatbots using Gemini API, embeddings, and vector search.
- Built a Loan Prediction System using machine learning algorithms.
- Performed data preprocessing, feature engineering, model training, and evaluation.
- Worked with Python, Scikit-learn, Pandas, NumPy, Streamlit, and Generative AI frameworks.

EDUCATION

B.TECH- Computer Science Engineering Aug 2025 – Apr 2029
Punjab Engineering College Chandigarh

SKILLS

Technical Skills: Python, C++, Java Script, Machine Learning, Deep Learning, Generative AI, DSA

Soft Skills: Teamwork

PROJECTS

AI Candidate Ranking System

Python, Streamlit, SentenceTransformers

- Developed an AI-powered candidate ranking system using SentenceTransformer and semantic search.
- Designed a two-stage ranking pipeline to filter the top 2,000 candidates before semantic re-ranking.
- Implemented a hybrid scoring model combining semantic similarity, career relevance, experience, and behavioral signals.
- Built an interactive Streamlit application for candidate ranking and CSV generation.

AI Personal Fitness Assistant Cum Trainer

Python, Sarvam API, Streamlit

- Developed an AI-powered Personal Fitness Trainer using Retrieval-Augmented Generation (RAG) to deliver personalized workout, nutrition, and fitness guidance.
- Implemented user profile personalization using age, height, weight, fitness goals, activity level, and diet preferences to provide customized recommendations.
- Developed modules for BMI, BMR, TDEE, calorie, and macronutrient calculations to support personalized fitness planning.
- Designed an interactive Streamlit web application with chat history, real-time responses, and an intuitive user interface.

Link: <https://github.com/harshitkushwaha460-byte/Gym-trainer.git>

AI Mood Detection & Wellness Assistant

Python, TensorFlow, Keras, EfficientNetB0, OpenCV, Streamlit, FAISS, Sentence Transformers, RAG, Sarvam API

- Developed a real-time AI Mood Detection application using EfficientNetB0 and transfer learning for facial emotion recognition.
- Trained and fine-tuned an EfficientNetB0 model on a labeled emotion dataset with data augmentation to improve classification performance.
- Implemented image preprocessing, face detection, and real-time webcam inference using OpenCV.

- Built a Retrieval-Augmented Generation (RAG) pipeline using FAISS and Sentence Transformers to retrieve contextually relevant wellness information.
- Integrated an LLM through the Sarvam API to generate personalized wellness recommendations based on the detected emotion.
- Designed an end-to-end AI solution combining Computer Vision, Deep Learning, Vector Search, RAG, and Generative AI.

LOAN PREDICTION SYSTEM

Streamlit, ML Algorithms

- Developed a machine learning-based loan approval prediction system.
- Performed data preprocessing, feature selection, and model evaluation.
- Generated approval probability scores and loan summaries for decision support.

Link: <https://github.com/harshitkushwaha460-byte/-AI-projects.git>

E-Commerce Advisor Chatbot

Python, Google Gemini API KEY, Streamlit

- Developed a RAG-based chatbot for providing intelligent product recommendations.
- Implemented document retrieval using embeddings and vector search.
- Delivered context-aware responses using Generative AI techniques.

Link: <https://github.com/harshitkushwaha460-byte/-AI-projects.git>

CERTIFICATIONS

Internship Certificate - Unlox (Rivoquix Learning Private Limited)

-May 2026

Developed and deployed two Retrieval-Augmented Generation (RAG) based chatbots, enabling accurate and context-aware responses using large language models and vector databases. Utilized tools and technologies including Python, Scikit-learn, Pandas, NumPy, Machine Learning, Deep Learning, Generative AI, and RAG frameworks. Collaborated in a project-based environment to develop practical AI solutions addressing real-world business problems.
